

RUTUJA JADHAV

QA Automation Engineer / Playwright | Selenium | TypeScript | Java | TestNG | CI/CD
+91-9730341924 | 1201rutujajadhav@gmail.com | Hinjewadi, Pune, Maharashtra 411057

PROFESSIONAL SUMMARY

QA Automation Engineer with 2+ years of experience in UI automation, functional testing, regression testing, defect management, and Agile quality delivery. Skilled in designing and maintaining reusable automation frameworks using Playwright with TypeScript, Selenium with Java, TestNG, Page Object Model, Maven, Git, Jenkins, Postman, Cucumber, and JIRA.

Recognized for clear stakeholder communication, proactive defect triage, disciplined test reporting, and collaborative execution across QA, development, and client teams. Strong hands-on exposure to Opera Cloud PMS and collection-management web applications, with a focus on scalable test coverage, stable release validation, and high-quality software delivery.

TECHNICAL SKILLS

Automation Testing: Playwright, Selenium WebDriver, Tosca, TestNG, Cucumber, Page Object Model, modular framework design, reusable wrappers, data-driven testing

Programming & Scripting: TypeScript, Java, C#, object-oriented programming, test utilities, reusable methods

API & Backend Testing: Postman, REST API validation, request/response verification, test data setup

Testing Practices: Functional testing, smoke testing, sanity testing, regression testing, system testing, defect lifecycle, SDLC/STLC, test execution reporting

DevOps & Collaboration: Git, Maven, Jenkins, CI pipeline execution, JIRA, Agile/Scrum, daily stand-ups, client status reporting, cross-functional communication

Tools & IDEs: Visual Studio Code, Eclipse, Visual Studio, Excel utilities, reporting dashboards, test result analysis

WORK EXPERIENCE

Test Analyst | **Verve Square Technologies** | Feb 2025 - Present | India

Technology firm specializing in functional testing and automation testing solutions.

- Designed and automated UI test flows using Playwright with TypeScript, Selenium with Java, and TestNG, improving repeatability across smoke, sanity, and regression test cycles.
- Developed reusable automation utilities for date pickers, loaders, iFrames, Excel handling, and common page actions to improve framework maintainability and reduce duplicate test code.
- Executed regression suites, analyzed test execution reports, and communicated clear quality status updates to clients and internal stakeholders.
- Logged, tracked, prioritized, and verified defects in JIRA while collaborating with developers and QA team members to accelerate resolution.
- Supported Opera Cloud PMS booking and reservation module testing with reusable Playwright wrappers and scenario-focused validation.
- Participated in Agile ceremonies, daily status calls, and defect discussions with strong ownership, communication, and teamwork.

Software Engineer / Test Automation | **Persistent Systems** | Jul 2022 - Jul 2023 | India

Software services company focused on enterprise technology solutions.

- Designed and executed manual test cases from business requirements, functional specifications, and user scenarios for enterprise application workflows.
- Performed smoke, functional, system, and regression testing to validate application stability, business-rule accuracy, and release readiness.
- Analyzed execution results, prepared test reports, and communicated testing progress, risks, and defect trends during client DSM calls.
- Tracked and retested defects through JIRA, coordinating with development teams to verify fixes and prevent release leakage.
- Committed automation and test-related code updates using Git and followed established coding standards for maintainable test assets.
- Contributed to automation framework development and CI pipeline implementation, supporting reusable test execution and improved production quality.

PROJECTS

Atlantis Web Application | Feb 2025 - Present | India

Web-based platform for collection management and online publication, enabling workset creation, annotations, advanced search, editing, reporting, and configurable user roles.

- Developed and executed data-driven UI automation scripts using Playwright with TypeScript for critical user workflows.
- Created reusable methods for date picker handling, loader waits, iFrame interactions, Excel utilities, and common page operations.
- Maintained test suites, reviewed execution reports, and shared structured test status updates with client stakeholders.
- Configured and managed test data while tracking and validating defects in JIRA across Agile delivery cycles.

OCPMS Platform | Jul 2022 - Jul 2023 | India

Opera Cloud Property Management System supporting hotel operations including guest profiles, reservations, booking workflows, and release validation.

- Performed system, functional, smoke, and regression testing for Guest Profile and Reservation modules based on business and functional requirements.
- Designed and executed manual test cases to validate end-to-end hotel operations and critical application workflows.
- Logged, tracked, and verified defects in JIRA while coordinating with development teams for timely resolution.
- Prepared test execution reports and provided regular testing updates to stakeholders for release decision-making.

CERTIFICATIONS

- Tosca Specialist AS1 & AS2 - Tricentis Tosca automation fundamentals and specialist-level certification.
- Microsoft AZ-900 - Microsoft Azure Fundamentals covering cloud concepts, Azure services, security, compliance, and pricing basics.
- Java Course - Practical Java programming, object-oriented concepts, and application development fundamentals.

EDUCATION

Post Graduate Diploma: CDAC, Sunbeam Infotech, Pune | Mar 2024 - Aug 2024 | India

Bachelor of Technology: D.Y. Patil College of Engineering & Technology | Aug 2018 - May 2022 | Kolhapur, India

TOOLS & TECHNOLOGIES

Selenium WebDriver, Playwright, Tosca, TestNG, Cucumber, Java, TypeScript, Postman, REST APIs, Maven, Git, Jenkins, JIRA, Eclipse, Visual Studio Code, Visual Studio, Page Object Model, Functional Testing, Regression Testing, Smoke Testing, Sanity Testing, SDLC, STLC, Agile/Scrum.

ACHIEVEMENTS

- Built scalable and reusable automation framework components that improved test maintainability, execution consistency, and coverage quality.
- Implemented CI pipeline support for automated testing workflows, helping improve release confidence and reduce production defect risk.
- Improved client-facing QA communication by preparing structured execution summaries, defect reports, and release validation updates.
