PROFESSIONAL SUMMARY

DevOps Engineer with 4 years of experience in designing, implementing, and optimizing CI/CD pipelines, cloud infrastructure, and containerized applications. Strong expertise in AWS, Kubernetes, Docker, and Infrastructure as Code (Terraform, CloudFormation). Proven ability to improve deployment efficiency, system reliability, and scalability using automation, monitoring, and DevSecOps practices.

CORE COMPETENCIES

CI/CD Pipeline Automation, Infrastructure as Code (IaC), Cloud Architecture (AWS), Containerization, Kubernetes Orchestration, Monitoring and Logging, DevSecOps, Automation and Scripting, System Reliability

TECHNICAL SKILLS

- **Cloud Platforms:** AWS (EC2, S3, IAM, VPC, RDS, EKS, CloudWatch, SNS, Lambda)
- **CI/CD:** Jenkins, GitHub Actions, AWS CodePipeline, CodeDeploy
- **Containerization and Orchestration:** Docker, Kubernetes (EKS, HPA, Auto Scaling)
- **Infrastructure as Code:** Terraform, CloudFormation
- **Monitoring and Logging:** Prometheus, Grafana, CloudWatch, CloudTrail
- **DevSecOps Tools:** Trivy, SonarQube, OWASP Dependency Check
- **Scripting:** Python, Bash
- **Configuration Management:** Ansible
- **Version Control:** Git, GitHub
- **Build Tools:** Maven, Nexus
- **Operating Systems:** Linux (Ubuntu, RHEL), Windows

PROFESSIONAL EXPERIENCE

DevOps Engineer

Capgemini Technologies, Pune

Duration: 2022 – Present

Project: Banking Application

- Designed and implemented end-to-end CI/CD pipelines using Jenkins, improving deployment speed by 40%.
- Automated infrastructure provisioning using Terraform and AWS services (EC2, VPC, IAM), ensuring scalable and consistent environments.
- Containerized applications using Docker and deployed on Kubernetes (EKS) with auto-scaling and high availability.
- Integrated security scanning tools (SonarQube, Trivy, OWASP Dependency Check) into CI/CD pipelines to enforce DevSecOps practices.
- Implemented monitoring solutions using Prometheus and Grafana, achieving 99.9% system uptime.
- Reduced manual deployment effort by 60% through automation and scripting (Python, Bash).

Project: Cloud Monitoring and Logging System

- Designed centralized monitoring and logging using AWS CloudWatch and CloudTrail.
- Configured real-time alerts using SNS, reducing incident response time by 30%.
- Analyzed logs and metrics to troubleshoot performance bottlenecks and system failures.
- Developed dashboards for real-time system visibility and performance tracking.

CERTIFICATIONS

- AWS Certified Solutions Architect – Associate
- Microsoft Azure Administrator Associate (AZ-104)

EDUCATION

B.Tech – Electronics and Telecommunication

2022

Shivaji University

CGPA: 8.57
