Data Engineer specializing in designing and optimizing cloud-based data pipelines using Snowflake, Azure Data Factory, Python, and SQL. Skilled in ETL/ELT pipelines development, data warehousing, and analytics with a strong grasp of data architecture. Skilled in building scalable data solutions on Azure and Snowflake for BI and data-driven decisions.

WORK EXPERIENCE

Data Engineer, Hoonartek India

Jan 2023 - Present

Marine Shipping Analytics Products

- Designed and implemented scalable ETL/ELT pipelines using Azure Data Factory and Snowflake to ingest and transform large volumes of **structured and semi-structured data**.
- Designed and implemented a scalable data architecture in Snowflake **data warehouse** using the Medallion pattern, with clearly defined Staging/Raw, Curated, and Presentation layers to ensure high data quality, reusability, and end-to-end traceability.
- Utilized **Snowpipe** for **real-time data** ingestion from Azure Blob Storage, enabling near real-time analytics.
- Developed and scheduled **Streams and Tasks** for incremental data processing and automation of data workflows.
- Implemented **Time Travel** and **Zero-Copy Cloning** for data recovery and testing environments.
- Skilled in developing **advanced SQL** queries with joins, window functions, and subqueries to support **analytical reporting** and exploratory **data analysis**.
- Enhanced performance by implementing **query optimizations**, **warehouse sizing**, and **partitioning** strategies tailored to specific data volume and usage patterns.
- Designed and developed **Snowpark** based stored procedures to run **ML models** for in-database data enrichment, supporting Curated and Presentation layers in a Snowflake.
- Set up Snowflake **RBAC (Role-Based Access Control)** for DEV, UAT, and PROD environments.
- Enhanced data **security** and **governance** by implementing Column and **Row Access Policies**.
- Authored **SOP documentation** for ETL pipelines, Snowpark procedures, and deployment practices to support cross-team collaboration and knowledge transfer.
- Contributed across the full project lifecycle: from **requirement analysis** to **development** and **AMC support**, ensuring robust delivery and post-deployment continuity.

SKILLS

- Snowflake:** Snowflake Architecture, Virtual Warehouses, Snowpipe, Streams & Tasks, Time Travel, Zero-Copy Cloning, RBAC, Materialized Views, Query Performance Tuning, Data Sharing, Internal & External Stages, COPY INTO, MERGE, Stored Procedures, Streamlit
- Data Engineering & Cloud:** Azure Data Factory (ADF), Azure Blob Storage, ETL/ELT Pipelines, Data Integration
- Languages & Querying:** SQL, Python
- Visualization & Reporting:** Power BI

EDUCATION

B.Tech in Computer Science, DKTE Institute, Ichalkaranji

CGPA: 7.6

Aug 2019 - Jul 2023

CERTIFICATION

- Snowflake **SnowPro Core** Certified
